Bhanuprasad L.

FULL-STACK SOFTWARE ENGINEER

Bengaluru, India • +91 9948515012 • bhanuprasad.0921@gmail.com • LinkedIn • GitHub • Portfolio

Summary

Full-Stack Software Engineer with nearly three years of experience building web and mobile products with **TypeScript, React, Next.js, React Native, Expo, Node.js, PostgreSQL, and MongoDB**. Own features across interfaces, APIs, data models, authentication, third-party integrations, and application architecture, with a focus on data-heavy workflows, product usability, and maintainable typed systems.

Professional Experience

Cynosure Software Solutions Pvt. Ltd. — Software Engineer

Dec 2023 – Present

Full-Stack Development — Remote

- Build and refine product features with **React, Next.js, and TypeScript**, turning requirements and designs into reusable components and responsive flows, reducing UI duplication by ∼**30%**.
- Manage server state with **TanStack Query and REST APIs**, handling caching, invalidation, loading and error states, reducing redundant API calls by ∼**40%** across product workflows.
- Develop backend services with **Node.js and Express.js**, implementing REST APIs with validation, authentication, business logic, and persistent data flows for end-to-end product features.
- Establish reusable UI patterns and contribute to redesigns across forms, tables, filters, dashboards, navigation, and data visualization, improving page load performance by ∼**25%** across devices.

Projects

SplitFin — Personal Finance & Investment Platform

Private repository

React Native • Expo • Expo Router • TypeScript • PostgreSQL • Prisma • TanStack Query • Zod • Recharts

- Built a **mobile-first personal finance and investment platform** spanning accounts, transactions, budgets, recurring expenses, cash flow, investments, portfolios, market data, analytics, and multi-currency views across **10+ currencies**.
- Designed financial data architecture with **PostgreSQL and Prisma**, modelling accounts, transactions, budgets, holdings, and portfolios while separating provider data from user-owned records.
- Engineered a **multi-provider financial connectivity layer** supporting regional and investment providers, with isolated workflows for account linking, holdings, transactions, and investment data across **5+ providers**.
- Integrated **financial-data, equity, crypto, and currency providers**, normalizing account, pricing, and currency data for portfolio valuation, allocation, and analytics with near real-time updates.
- Built the **React Native, Expo, and Expo Router** app with interactive dashboards, portfolios, allocation, cash flow, history, and transaction workflows, with resilient states for stale or unavailable data.

StayEase — Stay Marketplace & Booking Platform

Private repository

React • React Native • Node.js • Express.js • MongoDB • JWT • Stripe • Cloudinary

- Built a **web and mobile stay marketplace** spanning property discovery, room selection, availability, bookings, reviews, customer accounts, property management, payments, administration, and owner workflows.
- Designed shared **REST APIs and backend services** for discovery, filtering, pagination, availability, bookings, reviews, account operations, and property workflows, supporting both web and mobile clients.
- Implemented **JWT authentication and role-based authorization** for customers, property owners, and administrators, enforcing ownership and permission boundaries across protected server operations.
- Integrated **Stripe and Cloudinary** through application services while developing conversational stay discovery, booking assistance, responsive web interactions, and mobile workflows, reducing image load size by ∼**50%**.
- Structured shared **business rules and API contracts** across property, booking, account, and payment domains, keeping behavior consistent across web and mobile experiences and reducing duplicated logic by ∼**40%**.

Technical Skills

Languages	TypeScript, JavaScript (ES6+), Python	**Web Frontend**	React, Next.js, Tailwind CSS
Mobile	React Native, Expo, Expo Router	**Backend & APIs**	Node.js, Express.js, Hono, REST APIs, JWT
Data & Validation	PostgreSQL, MongoDB, Prisma, Zod	**State & Server Data**	TanStack Query, Zustand, Redux Toolkit
Product UI	Recharts, Responsive UI, Component Architecture	**Integrations**	Stripe, Cloudinary, Financial Data APIs
Engineering	Git, GitHub, Postman	**Delivery**	Vercel, CI/CD

Education

B.E. — Information Science and Engineering

2019 – 2023

The National Institute of Engineering, Mysore
