BHANUPRASAD L

Product Engineer | bhanuprasad.0921@gmail.com | linkedin.com/in/bhanurx100 | github.com/bhanurx100

PROFILE

Product Engineer designing and building thoughtful digital products around real-world friction - uniting problem framing, resilient backend services, and calm interfaces.

EXPERIENCE

Cynosure Software Solutions - Software & Product Engineering

- Full-stack product engineering and delivery across production backend services, responsive frontend interfaces, and human-centered operational workflows.

EDUCATION

The National Institute of Engineering (NIE), Mysuru

- Computer science fundamentals, software architecture, and collaborative systems builds.

SELECTED PRODUCT WORK

01. StayEase (Web + Mobile Connected Hospitality)

Three-role accommodation ecosystem uniting Traveller discovery, Owner Hub bed/room/flat management, and Admin verification across hotels, PGs, hostels, homestays & villas.

02. StockPilot (Mobile Retail Inventory & Billing - Concept)

Pocket-first inventory control, SKU tracking, and quick-bill checkout engineered for neighbourhood kirana counters and growing multi-shelf retail shops.

03. Splitfin (Mobile-Only Personal Finance & Shared Expenses)

Mobile-only financial instrument uniting personal accounts, income & budgets directly with deterministic cent-exact group expense splitting and settlements.

CORE CAPABILITIES

Product Framing | Full-Stack Engineering | Mobile & Web UI Craft | Data Modeling
React / Three.js / Spatial Motion Systems | Deterministic Ledger & Business Logic
